

5-min, ATR(20), Box(1r)

Friday's surge into close provided escape from TR after morning gap broke support turned resistance. The 15-min chart pattern shows similar structure to 5-min, 3-box reversal with modified ATR scaling.

The P&F chart gives a conservative count of cause to retest the failed SoS (Sign of Strength) area of \$307 to \$314. Meeting that target would bring the larger structure counts to new highs into play.

Caution: News, especially covid19, could negate the positive work COs did over the last week to stabilize market. *The Traditional (3) P&F chart maintains a downside count to \$269 to \$223 – 17% to 33% off highs.*

Dramatic shift from selling to buying in volume signature
